

EMONA®

High yields and quality

RECOMMENDED FOR OPEN FIELDS AND LONG CANES

Emona® is a primocane cultivar with high yields and high quality fruits. The berries maintain sizes throughout the season. The fruits are very firm with long shelf life and exceptional taste quality.

Cultivar **Emona®** possess very strong and vigorous canes and produce limited amount of shoots in comparision to Apema® . It is necessary t provid high support for the canes.

Emona® is suitable for spring and summer fruiting season. For the spring season the canes are maintained at 160-180cm at height. The cultivar is also very suitable for long canes in 5l pots grown under cover or in the greenhouse.

FRUITING PERIOD					
May	June	July	August	September	October

Recommended number of fruiting canes per linear meter with raw distance of 2.5–3m	
For spring season	6 – 10 pcs
For summer season	10 – 15 pcs
Planting distance in the row	70 – 80 cm
Main characteristics	
Yield spring – summer	2 000 – 2 500 kg
Yield summer – autumn	8 – 12 g
Single fruit weight	5 – 8 gr
Taste	Strong aroma, very firm
Fruit form	Conical elongated
Color	Bright pink to light red
